AES-Corp. Introduces New Marketing Communications Manager

Peabody, MA (August 30, 2006) AES-Corporation today announced the hiring of Deanne (Dee) Frazier as the new Marketing Communications Manager. Dee is responsible for providing the leadership and organization necessary to develop and maintain a marketing operation with the primary objective of generating sales leads for all divisions of the company. Toward that end, Dee will design and implement goal oriented, multi-faceted marketing programs to grow the business.

Dee acquired over 10 years of marketing and sales experience in various industries. Most recently employed as Marketing and Sales Coordinator for Microline Pentax, Inc. in Beverly, MA. In this role her responsibilities included the redesign of the company website, managing sales reports, quotas and commissions for the worldwide sales team, designing and implementing email promotional campaigns, creating marketing collateral, while managing tradeshow logistics.

Dee graduated from Northern Essex Community College in 1996 with high honors. She majored in Commercial Arts and minored in Journalism and Advertising.

Dee will be managing marketing communications for all four AES Divisions:

AES-Intellinet: www.aes-intellinet.com

AES Govt Products: www.aes-security.com

AES Technical Services : www.aes-tss.com

Advanced AMR: www.advancedamr.com

According to Mark Brandstein, Chief Operating Officer of AES Corporation, "We believe Dee's skills and experience are directly in line with the needs of the Marketing Communications Manager position and that she is a great fit within our organization." Please join all of us at AES-Corporation in welcoming Dee to our family and feel free to send her an email at dfrazier@aes-intellinet.com. She can also be reached by phone at 978-535-7310 ext. 115.

About AES:

Established in 1974, AES Corp. is the industry leader delivering high reliability wireless mesh networks to multiple industries including the fire alarm and burglary/intrusion market. Wireless mesh networking is an innovative technology for applications that need to communicate data over a large geographic area with a high level of reliability at a low cost of ownership. AES-IntelliNet network users in the Fire & Burglary/Intrusion Alarm industry have gained significant revenue, communications and cost advantages while meeting the high standards of reliability required. AES-IntelliNet systems are used in hundreds of thousands of locations in over 50 countries.
